

Aug 2, 2008

To whom it may concern,

We have relied upon BBS Systems for all our draught beer maintenance needs since they installed our 28-line draught beer system in May of 1998. After ten years of exceptional service and fair, comprehensive weekly assessments we trusted BBS Systems once again to install a brand new draught beer system in May of 2008. From keg to customer our new draught beer system is exceptional! We are selling a higher volume of great tasting pints while saving a ton of money on draught beer waste! We have installed BBS's Bevchek system as well to give us complete control of our usage versus sales and has proven to be a great tool to see real time reports. I can assure you that Greg Bamford and his BBS team is hands down the best in the business!
