

JOEY RESTAURANTS

We have worked with Greg for many years, and he truly is one of our core supplier partners. When looking at potential suppliers, one huge factor is the level of care that they show towards our restaurants and the quality of work that they do. BBS excels in both areas. His beer installations are done on time, on budget and are always well organized and tidy. Greg also stands behind all the work he does, and there have been instances where he has stepped in and solved issues regardless of fault or warranty. Also, having great people in each city that they do business ensures a consistent service level for our restaurants. Both Darren (Calgary) and Al (Edmonton) moved from Vancouver and have done a great job setting the high company standard in those cities. In a business that relies so heavily on consistency and on excelling at the little things, having BBS as a partner has allowed us to take comfort in the fact that our beer systems are in good hands so that we can focus on other areas. I would definitely recommend BBS for any bar installation or service that you require.
