Now bars, pubs, beer restaurants and mini breweries have a solution for foam-free beer dispensing from keg into glass bottle and/or in beer mugs - PEGAS CraftTap 2.0. This unique device opens up new business opportunities and let stand out from the others.

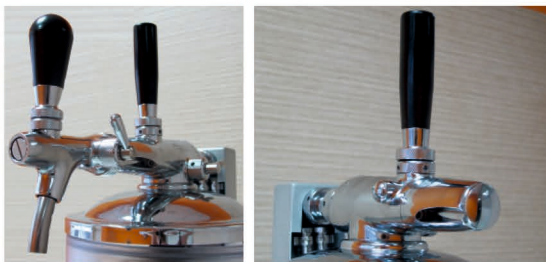

### PEGAS CraftTap 2.0: what makes it special?

#### Filling capacity: 1 minute — 2 liters

The PEGAS CraftTap uses a counter pressure method to fill bottles, generally applied in industrial bottling. Because of the method implemented PEGAS device fills beer fast and hygienic. So PEGAS CraftTap preserves original quality of your beverage.

#### Filling in glass bottles and/or in beer mugs

Device design allows to install a beer tap and to pour beer into mug.

#### Beer waste reduced to 0

PEGAS CraftTap eliminates the foam build up while bottling, so beer waste is substantially reduced. Regular methods of filling (hoses & beer taps) can amount up to 20% wastage from every keg. PEGAS CraftTap saves your beer, which means your profit.

#### Reliability proven over time

All key parts of the device are upgraded and strengthened accordingly to the results of long-term usage.

#### Bottle height: 250 to 400 mm

Fill the bottles you're used to! PEGAS Crafttap will accept most bottles types and with different neck diameter. You also can use traditional German-style growlers with handle.

#### Space to install: 350x350 mm

Professional equipment can be space-saving. For PEGAS Crafttap installing you don't need extra tables or rooms. You need a small area on bar or near to brewing equipment – you can start filling!

#### Training: 15 minutes!

Your staff can easily manage operating of PEGAS Crafttap. Easy operation allows fast training of your staff, so you can start use the device at the day of purchase.

**PEGAS CraftPad 2.0.** – is an additional device specifically designed for the PEGAS CraftTap filler. The PEGAS CraftPad uses 4 switching values to move between beers or other foamy beverages and to bottle them.

Switching lines manifold is sold separately and can be easily connected to the PEGAS CraftTap filler (CraftTap 2.0.) from every production batch.

#### Beer mixing eliminated

The PEGAS CraftPad has a 5th switching valve. Beer lines are connected to 4 valves and a CO2 line to the fifth. The 5th line is used to purge the beer line with CO2 to avoid beers mixing while bottling.

#### Additional place is not needed

Switching lines manifold can be connected to PEGAS CraftTap 2.0. and placed under it, what allows to save place without losing functionality.

#### Durable metal switchers

- low-wearing
- not sticky
- easy to clean
- easy to switch

#### Easy to handle

PEGAS CraftPad 2.0. is operated only with 5 switchers

#### Easy maintenance

Device can be easily assembled and disassembled.

#### 2 in 1

Instead of CO-2 hose at the 5th line can be connected a cleaning keg. In this case you can use PEGAS CraftPad 2.0. as a cleaning device.

#### Size-conscious design of switchers

Switcher taps are easy to handle and different colored.

#### Manufacturer warranty

Warranty period for PEGAS CraftPad 2.0. is 12 months as from the purchase date.
