RE: BBS Systems

To whom it may concern:

I have been in the pub business for more than 20 years now and in that time I have open several neighborhood pub's which involved draught systems. When we were building The Scotsman's Well we came into contact with BBS Systems and Darren which my first impression was very professional and passionate about draught beer.

The BBS team had promised a lot in service and installation saying they were the best and I can tell you after the installation and their service over the past 2 years they were correct, backing everything they had promised!!

Opening up a business in the boom of Calgary was at times frustrating and a challenge but the BBS team was the one bright light in the whole process!

They were not the least expensive system but after dealing with several different draught systems over the past 20 years there's is the best, we have no foam, the beer is always cold and the Bevcheck systems they put in let's me keep track of my product and keeps money in our bank account.

If a company is looking to put in a great draught system and looking for great service they will not go wrong with the BBS System team.

Yours truly,

Clint Thompson
